

### About the Society of Industrial and Applied Mathematics (SIAM) and its Fellows Program

SIAM is the world largest and most influential society in applied mathematics and computational science. It was established in 1952 as a nonprofit organisation to convey useful mathematical knowledge to other professionals who can implement mathematical theory for practical, industrial, or scientific applications. SIAM is an international community of over 14,000 individual members. Almost 500 academics, manufacturing, research and development, service and consulting organisations, government, and military organisations worldwide are institutional members.

Recognising the world's elites in applied mathematics and computational science, the SIAM Fellows Program honours individuals who have achieved outstanding accomplishments and made significant contributions to the field. It stands as one of the most prestigious honours in the discipline.
